- 13) **Characterization of efficient solutions in nonsmooth multiobjective problems using generalized invexity**, Numerical Computations: Theory and Algorithms NUMTA, 2019.

14) Optimality conditions for semi-infinite programming problems involving generalized convexity, Optimization Letters, 2019.

15) On stationarity for nonsmooth multiobjective problems with vanishing constraints, Journal of Global Optimization, 2021.

16) Quasi-Duality Results and Linearization in Multiobjective Quasiconvex Programming, Journal of Mathematical Extension, 2021.

کنفرانس:

1) p -th roots of elements in finite groups, 7th International Algebraic Conference in Ukraine

2) n -th roots classes of finite groups and a recognition problem, Fifth International Group Theory Conference, 2012.

3) Weak Slater Constraint Qualification in Nonsmooth Multiobjective Semi-infinite Programming, World Congress on Global Optimization, 2019.

کتاب:

1) معادلات دیفرانسیل معمولی؛ 1390

2) ریاضی مهندسی پیشرفته؛ 1395

طرح:

1) محاسبه ریشه های n -ام عناصر در گروه های پلی هدرال و سنترو پلی هدرال؛ 1392

2) بررسی خواصی از ناوردای بئر تعمیم یافته (C-امین ضربگر پوچ توان) یک جفت از گروه ها؛ 1393

3) محاسبه اندیس گوتمن برای برخی از نانو ساختارها؛ 1396
